TROPICAL WEATHER ADVISORY: PORT OF HOUSTON OPERATIONS

September 1, 2026

Dear Valued Evergreen Customer:

Evergreen is closely monitoring Tropical Storm Edouard and its potential impact on the Houston area and Upper Texas Gulf Coast.

Based on the latest forecast and current terminal conditions, we are not anticipating any changes to our Houston vessel, terminal, or gate operations at this time.

Although forecasts call for periods of heavy rainfall and gusty winds across portions of the Houston area today, the greatest weather impacts are expected east of the primary Houston terminal complex. We urge customers and drayage providers to remain mindful of local roadway and weather conditions when planning container pickups and deliveries. Customers are also encouraged to continue to monitor container availability and terminal appointment systems and to proceed with normal cargo arrangements unless otherwise advised.

Evergreen will continue to monitor local weather conditions and terminal operations. Should any changes become necessary, we will provide additional updates as soon as information becomes available.

If you have any questions, please contact your Evergreen Sales Representative. A comprehensive contact list can be found by visiting <https://www.evergreen-shipping.us/egsweb/jsp/officelist.jsp>

Thank you for your business and continued support.
