

EVERGREEN LINE

SPECIAL ANNOUNCEMENT

Evergreen's suite of digital solutions provides convenience, safety and security in cargo transportation

June 17, 2020

Dear Valued Evergreen Customer,

Responding to the need for continually greater efficiency through digitization, and continuing its mission to provide the most optimized service to its customers, Evergreen Line proudly offers its **GreenX**, **i-B/L** and **i-Dispatch** platforms for convenience and safety in securing cargo transportation needs.

GreenX, available for all trades, allows customers to enjoy seamless booking capabilities in addition to direct access to integrated trade services, providing a digital portal for Evergreen customers to get instant quotes and book secured space with prioritized equipment supplied by the carrier.

GreenX benefits customers by giving them the ability to book directly with Evergreen Line within minutes without signing Service Contract. GreenX offers spot rates with secured space, providing customers greater flexibility and the ability to make bookings at times most convenient to them. With free registration, all customers are now able to utilize this one-stop digital platform anytime, anywhere, with essential information such as route searches, instant freight quotes and bookings just a few clicks away.

GreenX also empowers customers to make payments, submit VGM (Verified Gross Mass) and Bill of Lading instructions online, accelerating customers' ability to manage all shipping procedures within one single digital platform. In the near future, GreenX customers will also be able to access trade services such as freight financing, insurance, customs brokerage, trucking and warehousing, delivering a seamless container logistics solution throughout their supply chain.

GreenX service is available at <https://www.greenxtrade.com/>

Evergreen's **i-B/L** empowers shippers/consignees to manage the issuance and transfer of electronic bills of lading. It delivers all the benefits and speed of an electronic transfer but with same level of assurances that traditional paper bills provide. Using i-B/L provides the same workflow as a traditional bill of lading, allowing transfer to the shipper or their agents, the ability to request amendments, and transfer and surrender. If necessary, i-B/L also offers the ability to switch to a paper B/L to suit any additional needs. i-B/L provides the benefits of faster, more efficient transactions, greater security, and a reduction in processing and handling costs.

Building on i-B/L's benefits, Evergreen also offers **i-Dispatch** as a solution to convert and upload paper trading documents into intelligent digitized information that can be printed out for use by banks or consignees and allows customers to avoid the costs of courier services to transfer these documents. i-Dispatch is available to all customers utilizing i-B/L in their workflow and can also be used as a stand-alone tool. i-B/L & i-Dispatch service is available at <https://www.shipmentlink.com/>

For more information about any of these valuable options, please contact your local Evergreen sales representative.
