

EVERGREEN LINE

SPECIAL ANNOUNCEMENT

EVER FORWARD AGROUND AT PORT OF BALTIMORE STATUS UPDATE #5 - MARCH 25, 2022

March 25, 2022

Dear Valued Evergreen Customer,

Dredging remains ongoing in the areas identified within the refloating plan and these efforts continue to make substantial progress. Once dredging has completed to the extent expected to be required, tugboats and the ship's own propulsion will be utilized in an attempt to dislodge the ship.

Evergreen continues to closely monitor the progress of this excavation, working with the salvor, Donjon Smit, to assure adherence to the plan. As efforts progress, Evergreen will continue to work with the competent authorities to evaluate conditions so that we may assure the safety and security of all personnel, the vessel and its surroundings until such time as successful refloating is accomplished.

We will continue to update you as the situation evolves. Please contact your Evergreen Sales Representative or Customer Service Team with any questions you may have. A comprehensive contact list can be found by visiting below url:
